Rick,

You're right! I wasn't thinking. The Washington Works permit (WV0001279) was last issued back in 2003, according to our records, and keeps getting administratively extended.

**Ex. 5 Deliberative Process (DP)**

**Ex. 5 Deliberative Process (DP)**

The 2003 permit can be found in the [G:\NPDES Final Permits - Electronic\WV\E.I. DuPont - Washington Works \(WV0001279\)\2003 issued permit folder](#).

Molly,

Yes Matt would be the contact for Washington Works also, and yes please keep us in the loop. I am also attaching the 2003 permit (it's a pretty large file) and its fact sheet, FYI.

Brian

Rick and Brian,

You probably know better than I which Chemour plant produces the GenX compound. I found the Belle plant on the internet and after reading about it I was thinking this was it. Sorry for my confusion but I probably need the Washington Works facility permit. I'll ask Julie Grzyb in NC to ask Matt at WV about the Washington Works facility. Molly

Brian,

Thanks for looking into this. I just heard/saw the VM message from Molly and an email from my R4 counterpart about this and was going to turn to you for help. Would it be possible to obtain the permit that is currently in place?

Molly, are you sure it's the Belle Plant you are interested in? The Chemours plant in WV that had been manufacturing PFOA (and releasing it) was their Washington Works plant in Washington, WV located on the Ohio River. Their Belle Plant manufactured chemicals for the agriculture industry and is located on the Kanawha River.

Brian, would there be a separate permit for the Washington Works plant?

Rick

**Subject:** RE: WV0002399

Hi Molly,

Looks like WV0077054 is a permit issued for leachate from the facility's waste disposal/landfill site. We don't have any info for that permit. WV0002399 is the facility's main NPDES permit. My records show that it expired on 6/30/2013 and has been administratively extended ever since. The last draft permit we saw was back in 2015, in which we provided a number of comments to the State. We have not heard anything on the reissuance of this permit since then. This permit

**Ex. 5 Deliberative Process (DP)**

It probably makes more sense for your NC contact to get in touch with our WVDEP contact to get an understanding of what WV is developing for this reissuance. Our contact at WVDEP is Matt Sweeney ([matthew.l.sweeney@wv.gov](mailto:matthew.l.sweeney@wv.gov)) at 304-926-0499 x1019. Hope this helps. If not, let me know and we'll try to track down more specifics for you.

Thanks,  
Brian

Brian,  
I am trying to help NC find an NPDES permit for the Chemours Belle Plant in WV. I believe the permit # is WV0002399 but I also saw in the DMR loading tool reference to another NPDES permit given to the facility under the ID WV0077054. **Ex. 5 Deliberative Process (DP)**

**Ex. 5 Deliberative Process (DP)** Becky Allenbach, our acting deputy director, suggested that I call Rick Rogers and I left a voicemail message for him. Thanks in advance for the help! Molly
